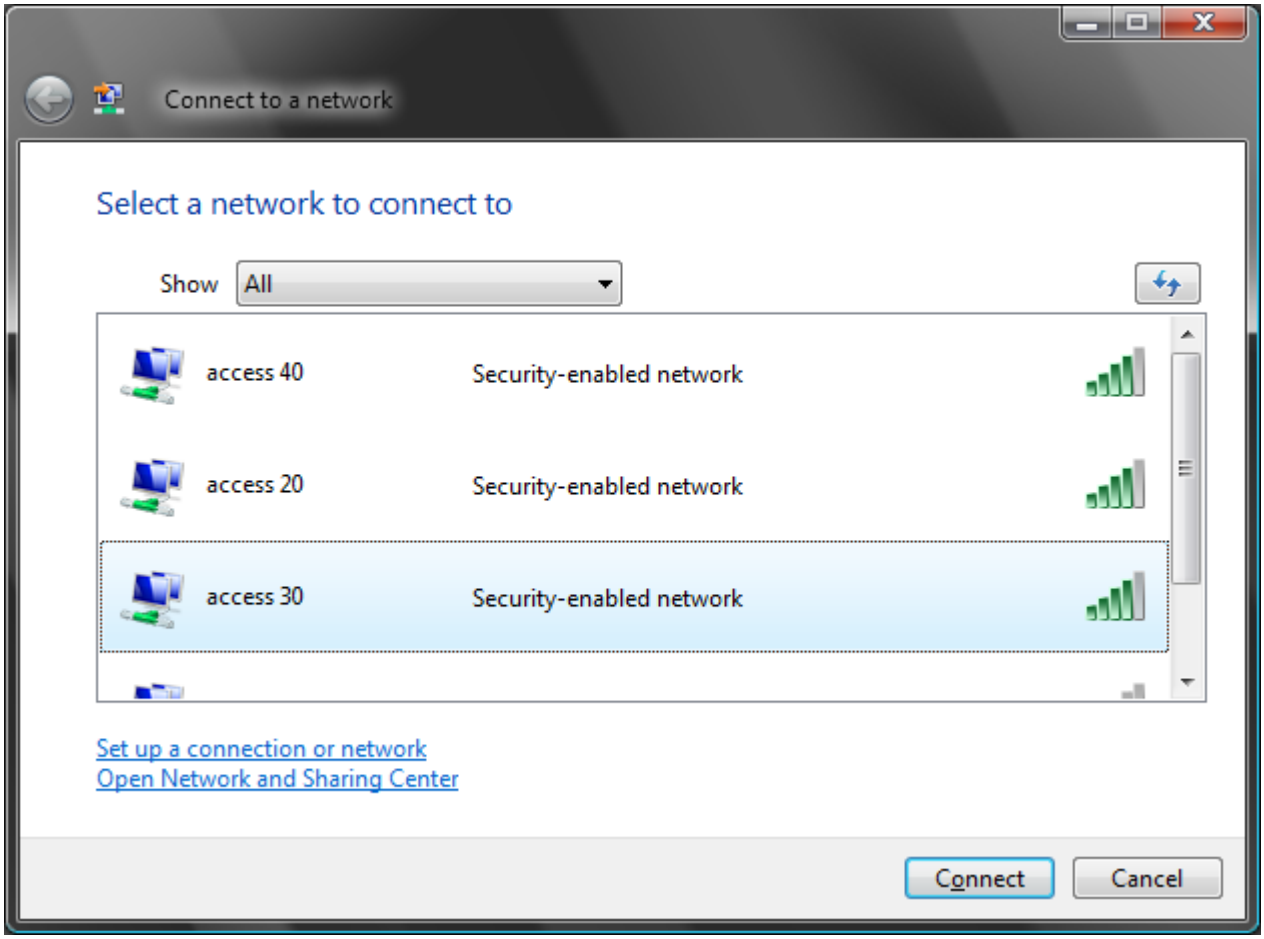
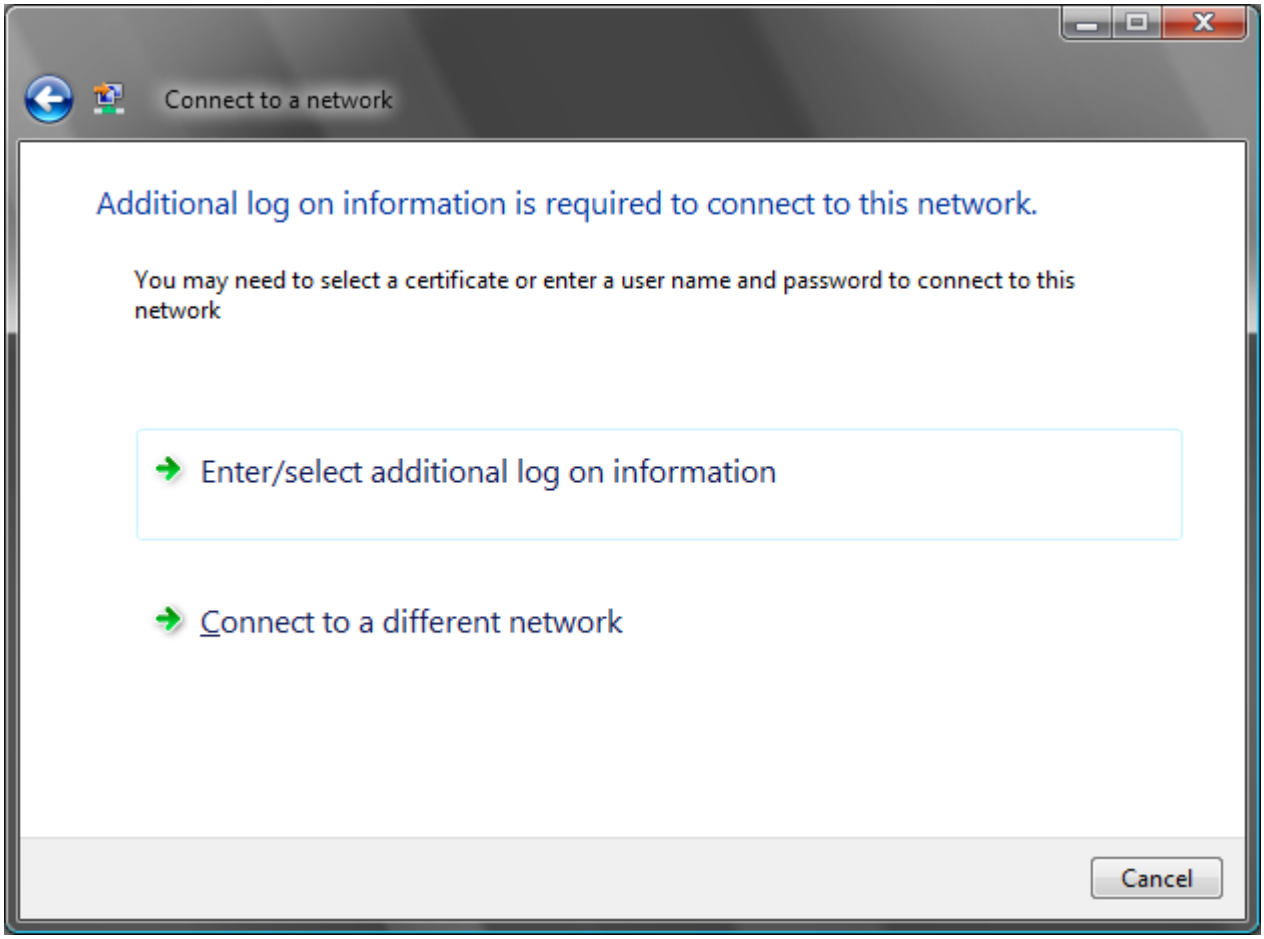
Configuring Access 30 on Windows Vista

Note: Only computers running Windows Vista Service Pack 1 or higher can connect using these instructions.

1. To start configuring your wireless, click **"Start" » "Connect To"**.
2. A box should open displaying all available wireless networks. Select "access 30" and then **Connect**.



3. Select **Enter/select additional log on information**.



4. To authenticate, enter the following information:
    - User Name: **Missouri State Private ID**
    - Password: **Missouri State Password**
    - Logon domain: **SGF**

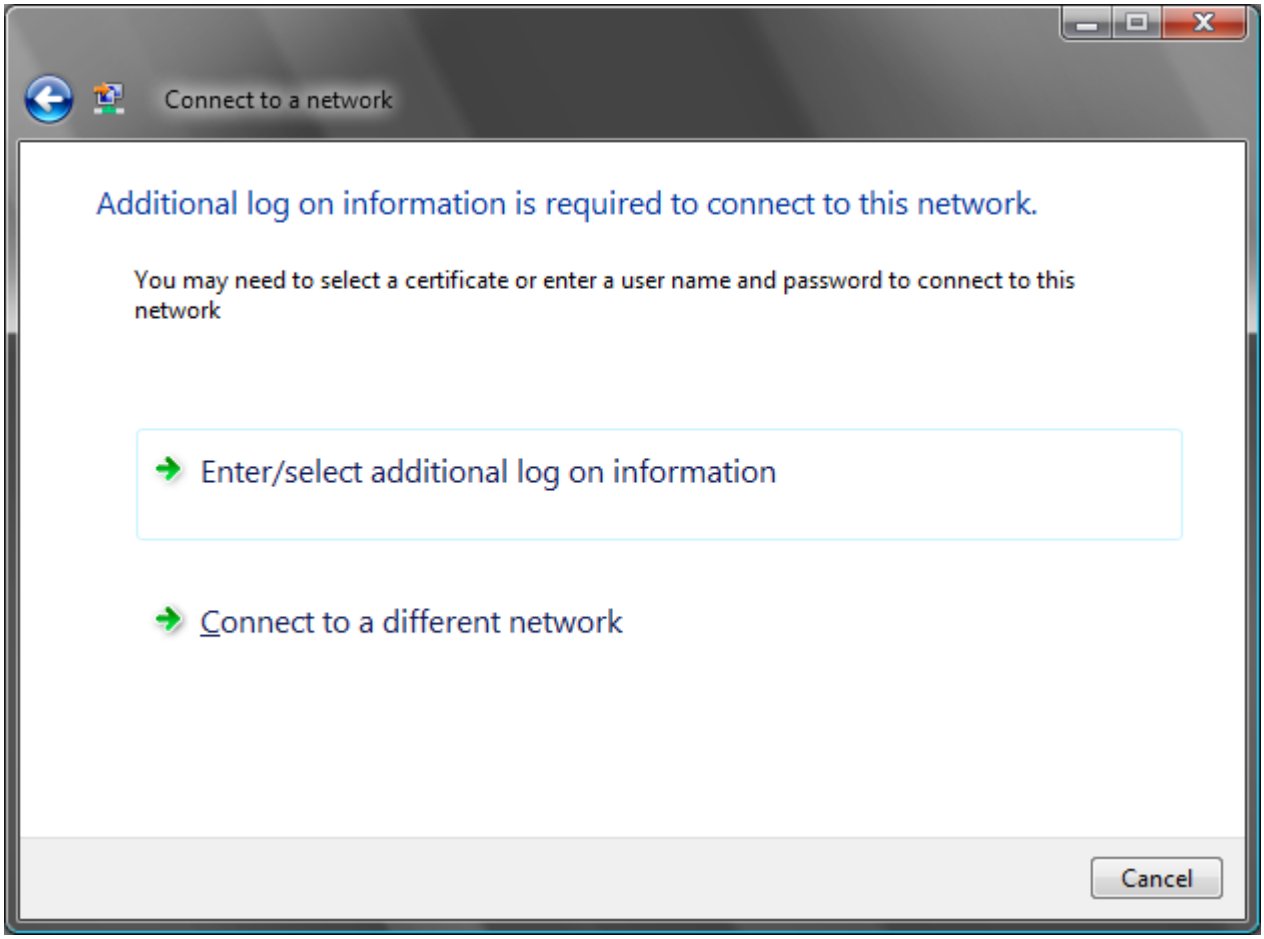
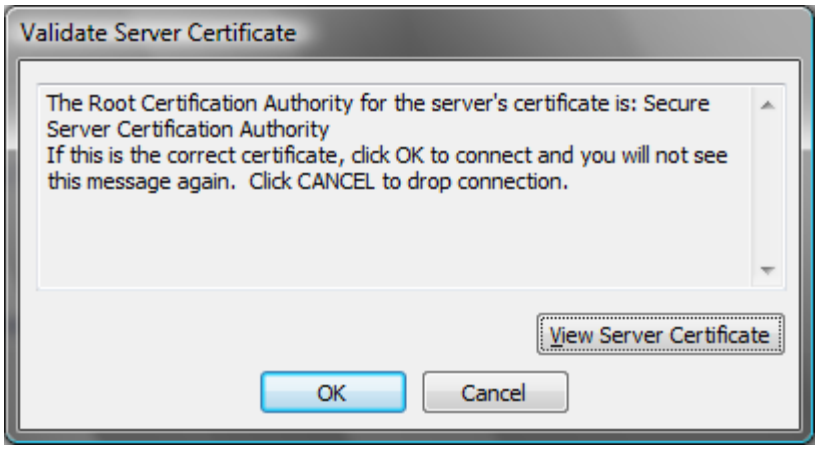
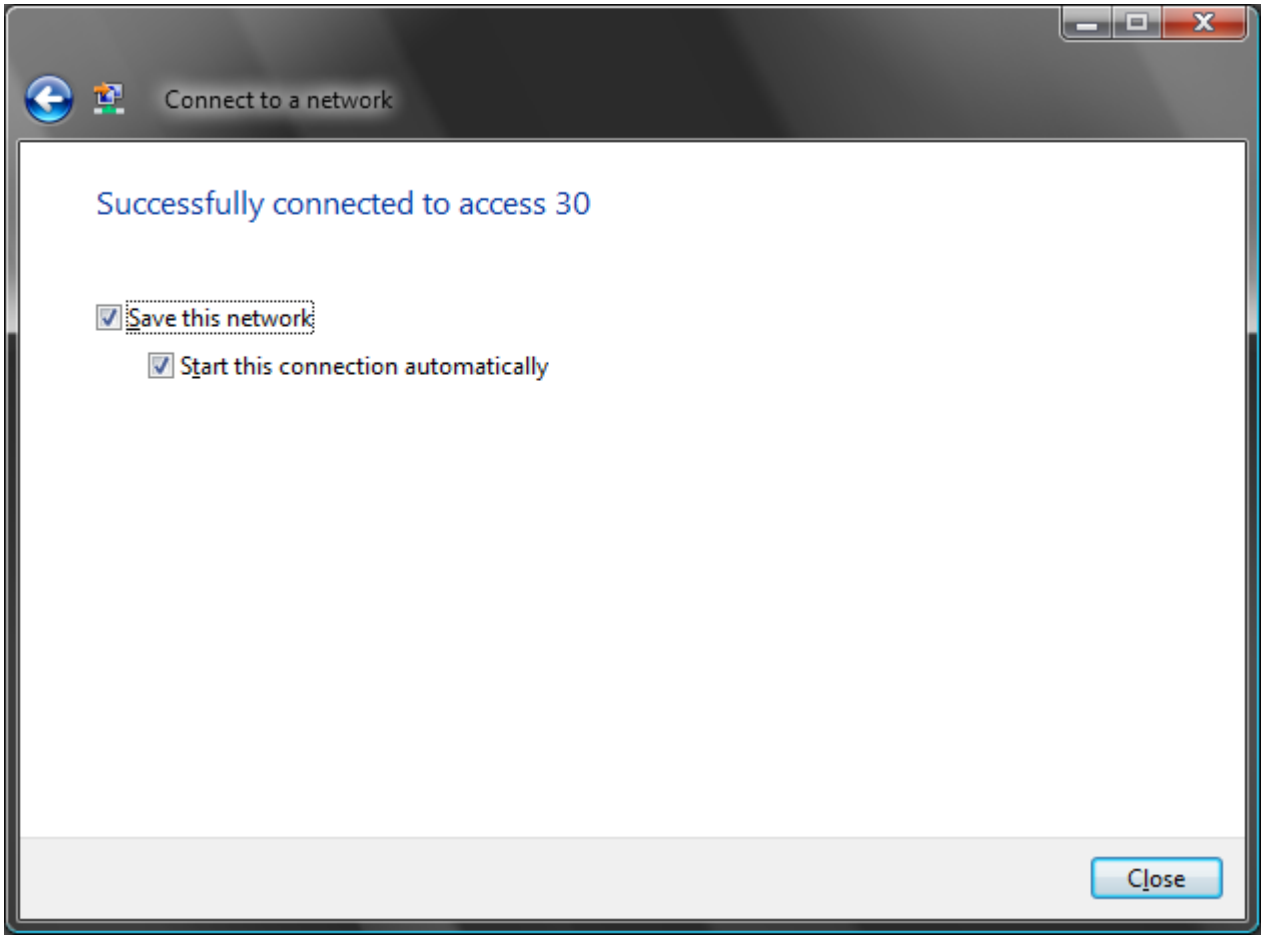
5. Select **Enter/select additional log on information** again.



6. Select **OK** to accept the server certificate.





7. You should now be connected to the "access 30" network.
