

## Sony PS2 Registration and Configuration

*There are two versions of the PlayStation 2: a slimline version manufactured after September 2004, and the original PS2.*

### Slimline PS2

1. Turn on your PlayStation 2 console with no game disc in the disc tray.
2. From the main screen, press the **triangle** button.
3. This will bring up the **System Information** screen where the 12-character MAC address will be listed.  
(Double check the MAC address. On a TV screen it is easy to confuse the letter D with the number 0 and the letter B with the number 8.)
4. Once you have this MAC address, you may proceed to <http://resreg.missouristate.edu> and register your PS2.

### Original PS2

1. Power up the PlayStation 2 and load the Network Adapter Startup Disc.
2. Once it has loaded, select **ISP Setup** and press X.

3. The ISP Setup will begin to load, and you will be presented with a license agreement. Select **Agree** and press X to continue.

4. For connection type, choose **Local Area Network (LAN)** and press X to continue.

5. Select **Automatic Configuration** and press X to continue.

6. At the connection test screen, select **Advanced** and press X to continue.

7. At the Advanced Broadband Settings screen, make sure **Automatic** is selected. While you are at this screen, make note of the **MAC address** at the bottom. You will need this number to register

your game console.

*(Double check the MAC address. On a TV screen it is easy to confuse the letter D with the number 0 and the letter B with the number 8.)*

8. Once you have this MAC address, you may proceed to <http://resreg.missouristate.edu> and register your PS2.
