

Finding your Ethernet and Wireless MAC address on Apple TV

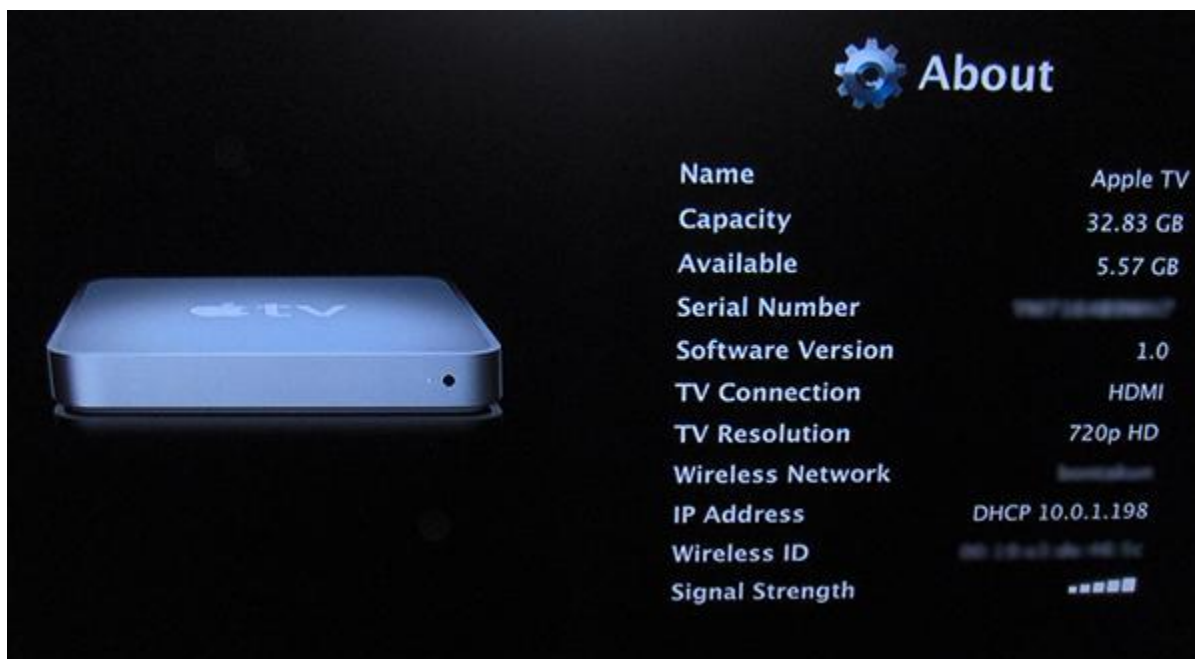

1. Go to the main menu on your Apple TV, and select "Settings."

2. In the Settings Menu, select "About."

3. Here you can find your MAC Address, listed as either the "Wireless ID" or "Ethernet ID" (depending on the connection you are using).

For a wired connection you will need to go to <http://resreg.missouristate.edu> and register your Apple TV.

Alternative Method for Locating the Wireless MAC Address

1. The Apple TV Ethernet (wired) and Wireless network MAC addresses can be found on the UPC label on the Apple TV box as "Ethernet ID" and "Wireless ID." (This is also the same label that contains the serial number.)

For a wired connection you will need to go to <http://resreg.missouristate.edu> and register your Apple TV.
