## Mac OS X

1. Click Apple Menu » "System Preferences".

2. Select "Network" and then click the "TCP/IP" tab.

3. Select "Built-in Ethernet" from the Configure menu located above the tabs.

4. Select "Using DHCP" from the lower Configure menu.

5. Click "Apply Now" in the lower corner of the window.
6. [Click here for an image tutorial](http://resnet.missouristate.edu/help/dhcp.php).
