# Configuring Access 40 on Mac OS X (10.5) - Leopard

1. Go to the AirPort menu, and select **Open Network Preferences**
2. Click **AirPort** on the left, and click **Advanced...** at the bottom right
3. Click the **802.1X** tab
4. Click on the + (plus) button in the lower left-hand corner, select **Add User Profile**, and then type a name for the configuration (e.g., access 40).
5. On the right, enter the following information:
   - User Name: **Missouri State Private ID**
   - Password: **Missouri State Password**
   - Wireless Network: **access 40**
   - Authentication: **PEAP**

   (Other autentications methods may be checked, but PEAP is required. Optionally, you can drag it to the top of the list.)

6. Click **OK**

7. Click **Apply**

   You are now finished! *When in an area with Missouri State wireless coverage, select "access 40" from the Airport menu to connect. (If asked, press "Continue" to verify the certificate.)*
